RESULT

Starting from core principles designed to significantly enhance the professionalism, authenticity, and impact of business writing in English; participants will learn how to move through the patented 3 levels to linguistic competency. These range from 'enough to transmit information' through 'authentic and natural-sounding' to 'evokes feelings and provokes action.'

We then cover the appropriate structures for the most commonly used business documents they need to create. Working with participants to identify and correct issues in their own writing, we explore the precise wording and phrases ideal for communicating with impact, and for dealing with the specific situations and functions of their jobs. These target areas will be drawn from real-life work samples of participant writing.

Finally, we help participants design and construct specific writing approaches and to develop templates geared to streamline the writing process for their most common business reports. This piece is vital for transferring the knowledge base gained in the workshop into fully actionable skills and habits that will stick with them in their jobs.
